**FROM PP's CORNER:** All disadvantaged groups e.g. women, children, aged and others irrespective of their castes, creeds, colours, status etc. have the inherent capacity to take responsibility and make choices about their lives. In fact, they are able to articulate and access their rights and emerge as leaders facilitating positive social change. People's Participation (PP) sees itself as a facilitator enabling this change. It believes that access to information and knowledge about the world and the changing political, social and economic structures contribute to the target groups having greater control over their lives.

A culture of silence prevents the disadvantaged groups from articulating their dreams and aspirations as well as to express the pains of violations they have experienced. People's Participation hopes to create a culture of questioning that strengthens their abilities to challenge and change the structures that keep them silent. A collaborative and collective process that connects individuals and organization with each other enhances learning in a mutually beneficial way. People's Participation aims to draw on this synergy to help reach common goals. **People's Participation** activities spread to several Districts in West Bengal and assistant has come from the local authorities, eminent personnel and citizens. Committed individuals from every lifestyle have chipped in. Since its inception, the goal of the People's Participation team has been to ensure that people gets their rights and is living in a healthy environment.

Over this 7-year period, People's Participation has organized thousands of people in different areas to become human rights facilitators, catalyzing life style changes within their communities. People's Participation has developed a unique model based on Peoples' rights to participation and development wherein they act as agents of change by forming groups and spreading awareness within their localities.

As we look back on another year and reflect on achievements and obstacles, let us reiterate the key elements that make **People's Participation** unique—its replicable and strong foundation, a broad vision encompassing an inclusive geographical approach, a complete coverage, coupled with close links and co-operation with the Government.

**Right to Information Program:** People's Participation also uses to conduct programmes on Awareness of Right to Information in different way; one is through its educational program and another is linkage with different Right to information campaign. We have conducted so many RTI camps with the support of some efficient RTI volunteers from Kolkata. PP itself also submitted so many RTI applications on behalf of peoples' interests. 'West Bengal Commissioner of Information' also supports us to conduct seminars in Colleges. We have planned to work along with the support of W.B. RTI Commission.

General Students, Poor middle class students and other young people became help full through these initiatives. Moreover, so many poor children did not drop outs from their schools lack of buying capacity for schoolbooks and other supporting educational materials to continue their further education.

**Empowerment program of Urban Women:** PP organized many programmes during the last three financial years to make aware the deprived and marginalized women. Regular meeting and interaction with the women empowered them through knowledge building & capacity building for their advancement. Linkage program with MSME helped them a lot. They trained and started some business. The Municipalities formed several T&C Groups among the poor, marginalized BPL women and they started inter lending among themselves. Many of them started small business. Bank linkage program, provident Fund for poor Govt program helped them. Beside all these D.V Act-2005, linkage program with MSME, Banks, and Municipalities programmes helped them to let them advance in life. ### **Sanitation:**

**Poor Awareness:** Sanitation has been accorded low priority and there is poor awareness about its inherent linkages with public health. Despite the appropriate legal framework, progress towards the elimination of manual scavenging has shown limited success, little or no attention has been paid towards the occupational hazard faced by sanitation workers daily.

Urban poor communities as well other residents of informal settlements have been constrained by lack of tenure, space or economic constraints, in obtaining affordable access to safe sanitation. In this context, the issues of whether services to the poor should be individualized and whether community services should be provided in non-notified slums should be addressed.

However provision of individual toilets should be prioritized. In relation to "Pay and Use" toilets, the issue of subsidies inadvertently reaching the non-poor should be addressed by identifying different categories of urban poor.

**Aged People program:** A regular meeting use to hold at different houses of the aged members. Usually the members discussed among themselves on political-social- cultural, National-International issues. In addition, the members writing letters to the Hospitals, Transport division to established aged peoples' Govt provided rights. The main emphasis was on prevention of drug and alcohol problems at the workplace. This was done through seminars; workshops.
